& only at Peachtree

TURNERS LASER GUIDE

Universal Mount, Real Time
Vessel Thickness Gauge

Accurately see your cutter location on the
outside of your vessel while it is spinning and
material is being removed

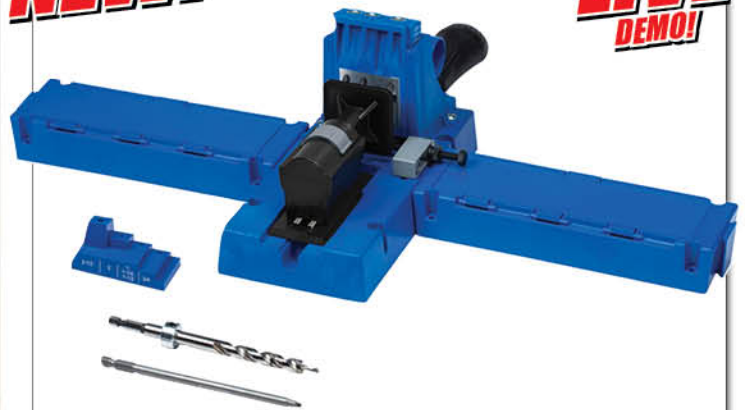

The Turners Laser Guide

enables you to know the location of a point on the cutting edge in real time even while the vessel is spinning and material is being removed. It utilizes a laser pointer to indicate the cutter position on the outside of the vessel while the cutter is actually inside the vessel and is otherwise impossible to accurately locate. The Universal Mounting Base allows the Turners Laser Guide to be attached to most any style, type or brand of hollowing tool. The Turners Laser Guide can be attached to either the turning tool ferrule or shaft ranging from 3/4" to 1-1/4" in diameter. With the stainless steel supports you can turn vessels 10" deep by 20" in diameter. The Turners Laser Guide can be set to show the position of the cutter or to show the offset to give you the ability to see the wall thickness of your vessel while it is spinning. The Support Arm Accessory Kit (sold separately) gives you the ability to use the Turners Laser Guide on vessels that are 20" deep by 38" in diameter.

THE MOST ADVANCED KREG JIG YET!

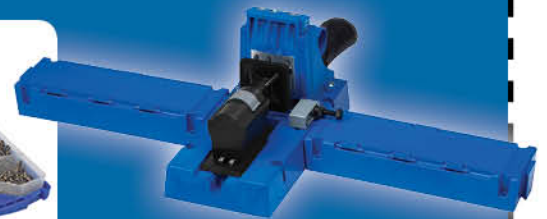

The Kreg Jig® K5

incorporates the features of every Kreg Jig® that came before with upgrades you've never seen. That starts with an all-new clamping mechanism that you can adjust without tools or adjusting nuts to match your workpiece thickness. Just slide the clamp into place, "click" the large front-mounted clamp handle, and your jig is set to hold your workpiece tight every time. Plus, you'll find large support wings to hold your wider workpiece steady—and they have storage compartments inside. Add in a batch of other great features like a standard swiveling dust-collection port, spring-loaded stop for the Drill Guide Block, and, of course, the ability to remove the Guide Block for portable use, and you have, quite simply, the most advanced Kreg Jig® yet.

NEW

PANEL MAX XL

Glue Panels as Large as 50" in Width!

The NEW Panel Max XL has extra long rails that allow you to glue panels up to 50" wide! Create large or smaller panels with great looking professional results every time with the Panel Max XL Glue Press System. The Panel Max XL makes stronger, more uniform joints than standard bar or pipe clamps. It applies even uniform pressure to the stock since it completely surrounds the work piece, which creates superior quality joints with much less hassle. The system also cuts the surface area required down about 90% since it mounts vertically to your shop wall while the stock is drying. The Panel Max XL can be easily cleaned of glue and residue build up and is designed to provide years of professional looking results every time you use it.

Always the Better Idea.

The 3D-Pantograph

from Milescraft is a stencil tracing jig for routers that allows you to carve nearly anything you can imagine. Use the included templates and line drawings (yields carved letters and drawings from 3.2-inches to 4.8-inches), or trace anything that you can print with your computer. We find that children's coloring books provide a great source of ideas and line drawings. Universal design fits ANY router with a 6-inch or smaller base. Some assembly required. For the advanced user, this product is also capable of routing/tracing 3 dimensional carvings and designs.

Illustration not to scale

Woodturning has never been Easier!

Easy Wood Tools offers a series of replaceable carbide cutter woodturning tools that address fatigue, safety and efficiency like no other tools. They are designed to effortlessly remove massive amounts of material on any woodturning project without the need for sharpening. The tools are designed with support directly beneath the cutting edge transferring the cutting pressure downward allowing the lathe to take the pressure that normally would go to your hands and body when roughing.

Stainless Steel Tool Bar

Never rust, and are flat for keeping flat on your lathe tool rest

Made from Maple or Bubinga

depending on the size

Carbide Tips

simply rotate then replace when needed

RON BROWN'S BEST

TURNERS LASER GUIDE

Universal Mount, Real Time Vessel Thickness Gauge

Always know where your cutter is

The Turners Laser Guide enables you to know the location of a point on the cutting edge in real time even while the vessel is spinning and material is being removed. It utilizes a laser pointer to indicate the cutter position on the outside of the vessel while the cutter is actually inside the vessel and is otherwise impossible to accurately locate. The Turners Laser Guide can be attached to either the turning tool ferrule or shaft ranging from 3/4" to 1-1/4" in diameter. With the stainless steel supports you can turn vessels 10" deep by 20" in diameter. The Turners Laser Guide can be set to show the position of the cutter or to show the offset to give you the ability to see the wall thickness of your vessel while it is spinning.
